

71% of organizations are stuck in “digital deadlock”, unable to significantly increase their digital maturity

IDC

Unleash Your Digital Agility

Our Accelerator package makes it easier for your team to take the first step into process automation with Bizagi through a bundle of software and services at a discounted rate. This combination allows you to rapidly initiate your cloud platform and create your first process application in just 7 weeks.

What is included?

Accelerator represents the most comprehensive packaged offering on the market for taking your first step into a new process automation platform. Only Bizagi Accelerator delivers a market leading process automation platform AND services to launch your first process application at a flat fee of \$175,000.

Software	+	Services
Your first year of Bizagi Automation cloud software on Microsoft Azure CLB0 (test) + CLS1 (production) + CLVPN (VPN)*		Our expert services to automate your first process in just 7 weeks Using the Bizagi QuickStart Program
\$175,000 <i>Terms and Conditions Apply*</i>		

Advantages of the Accelerator Package

1 Ideal Platform for Launch

Purchasing this combination of software and services ensures that your project gets off the ground quickly, and that you get value from your software investment, protecting against the risk of purchasing software or infrastructure that you do not use.

2 Pre-Agreed Package Discount

This bundle builds in a favorable discount that provides you with an immediate way to access the best possible pricing when bringing Bizagi into your business. This acts as a suitable starting point to test and prove the platform before scaling wider across the business.

3 Quick-Start Program Built-In

Our QuickStart implementation approach delivers market-leading time to value. Utilizing proven, modern and agile techniques, this is the first step of our overall Spark implementation framework, which sets you on the road to both short-term gain and long-term success.

What is the QuickStart Program?

With experience of successful implementations across the globe, we can help you select the perfect first process. This energizes your business through a 'quick win' that will dramatically enhance the success and value of your enterprise-wide initiative. This energize phase is the first step in our Bizagi Spark implementation framework that helps you convert your quick win into long term success.

Terms and Conditions

*Any requirement for a higher performance level will require a custom quote using our standard licensing options and the Bizagi Accelerator package will no longer apply. The package requires you to commit to a minimum two-year performance-based subscription contract for Bizagi Automation Service. The 1st year subscription costs are bundled into the Bizagi Accelerator price. The 2nd year subscription costs for Bizagi Automation Services will be at the standard price for the same performance level as in Year 1. Full contract terms, along with exact specifications of CLB0 and CLS1 performance levels for test and production environment, and CLVPN for VPN provision, will be provided by your Bizagi account team.
