

# Bizagi Government Cloud for Digital Modernization

Modern Apps Powered by Process

## Innovate on top of legacy systems

Use a low-code platform to drive transformation with new automated processes to improve your operations while leveraging existing assets.

## Orchestrate disparate systems and bots

By orchestrating the end-to-end process organizations are enabled to realize additional value from existing RPA and IDP investments.

## Enable innovation and citizen developers

Bizagi's platform unifies technical and non-technical staff through an inherently collaborative interface, accelerating transformation.

## Proven Success

### CALM

Bizagi enables process automation for GSA's Contract Acquisition Lifecycle Management System (CALM) program under GSA's Federal Marketplace Strategy.

### Pensions

Automating handling of citizen interactions and payments for a federal pension system with tens of millions of automated activities and millions of payments each month.

### Workers Compensation

Processing worker's compensation injury reports for a large U.S. state government (fully automating 75% of the work activity).

### Budget Management

Using Bizagi to improve the efficiency, transparency, and reliability of budget requests, on-boarding logistics, and other human resource-related processes.

# Accelerate Your Digital Modernization

With Bizagi, government can now deliver real digital transformation that builds on and orchestrates existing assets and investments in robotics automation, AI and intelligent content management systems. With Bizagi, government organizations can use low code to deploy modern applications to FedRAMP standards, improving citizen and employee experiences in delivering service of their agency mission.

## Business Productivity

- › Acquisition lifecycle management
- › Recruiting and onboarding
- › Supply chain management
- › Financial operations
