

Delivering Best-in-Class Document Processing & Digital Automation

The Hyperscience Platform leverages Machine Learning to enable a new era of human and machine collaboration that hyperautomates business processes. Paired with Bizagi’s intelligent process automation platform, our integration delivers a seamless, user-friendly case management solution that automates dynamic processes from input to actionable data.

➔ **With Hyperscience + Bizagi, speed up case management processes at scale with greater accuracy, so your employees can concentrate on high-value work and delivering an exceptional customer experience:**

Comprehensive Process Automation

Hyperscience extends Bizagi processes by automating the receipt, classification, and extraction of diverse business process-related documents and other unstructured content into actionable data.

Faster & More Accurate Operations

By eliminating the manual error-prone handling of documents and data entry with Hyperscience, Bizagi users can concentrate on high-value work and completing their work faster, with greater accuracy.

Accelerated Digital Transformation

Enterprises are enabled to forge enterprise-wide digital transformation with the powerful combination of artificial intelligence, digital process automation, and integrations with RPA platforms.
